- Collaborated with Management side to align project design with management vision and define project milestones

EDUCATION

MCGILL UNIVERSITY - MONTREAL, QC (2020 - 2024)

BSc. Honours Software Engineering

PROJECTS

POSITIVENEWS - WEB SCRAPER APP

- Collaborated with a team to develop a web scraper web app that scrapes news sites to algorithmically select positive articles. Script was written in **python**, and **Flask** backend made query calls to the **mysql** database. The frontend was built using **Vue** and **bootstrap**, with **axios** handling HTTP requests.

SHINZ - INSURANCE PAPERWORK HELPER

- Worked with a team to create a web app that uses an ML text summarizer and AI chatbot to make filling out insurance papers easier. Consisted of a **Flask** backend with frontend of **HTML+CSS** and **Bootstrap**.
